**Low-Saturation Bidirectional Motor Driver
for Low-Voltage Applications**

The LB1630 is a low-saturation bidirectional motor driver IC for use in low-voltage applications. It is especially suited for use in small-sized low-voltage motors for printers, cassette tape recorders, and consumer equipment.

Features

- Capable of operating from a low voltage (2.5V min). Low current dissipation at the standby mode ($I_{CC} \leq 30\mu A$)
- Low-saturation voltage (upper transistor + lower transistor residual voltage 1.2V max at 400mA)
- On-chip spark killer diodes
