

## Tech Support

### Information Regarding Drivers for Sierra Semiconductor Modem Chipsets.

For your information, PMC-Sierra no longer manufactures or supports modem chipsets. If you have a question about a modem that uses a Sierra chipset, please contact the modem manufacturer.

Every modem manufacturer has their own unique modem design and software. You must contact the manufacturer of the modem product for software and for any other information. PMC-Sierra has no documentation, software drivers or replacement components.

If you are looking for drivers or technical information about your modem, the following websites may be of interest.

<http://www.windrivers.com>

A resource for Windows 3.x, 95, 98, and NT drivers.

<http://modems.rosenet.net/mfr/mfrlist.phtml>

A list of modem manufacturers with links to support sites and drivers.

<http://comspec.com/mfglist/index.html>

A large list of computer and component manufacturers with links to their web sites.

<http://kb.quantex.com/tblshoot/modemmain.htm>

Modem troubleshooting guide for Quantex computers.

We are sorry that we can not assist you further. Please see our press releases on:

[Sierra Semiconductor's exit from the modem business.](#)

[Sierra Semiconductor's name change to PMC-Sierra, Inc.](#)
